PROFESSIONAL SUMMARY

Information Technology undergraduate with internship experience in software development, UI/UX design, database development, project management, and Agile delivery. Proficient in React, JavaScript, TypeScript, Bootstrap, Node.js, Express.js, Firebase, SQL databases, REST APIs, Git, AWS, and Figma. Experienced in developing user-centered digital solutions, collaborating with cross-functional teams, and supporting projects from requirements gathering through implementation. Seeking an internship where I can apply my technical expertise, problem-solving skills, and collaborative approach to meaningful product development.

EDUCATION

Bachelor of Science in Information Technology, *De La Salle University* Sep 2022 - Present

- CGPA: 3.358/4.000, Honorable Mention Standing

Merit Scholar, *Department of Science and Technology (DOST)* Sep 2022 - Present

EXPERIENCE

Software Development Intern, *Department of Science and Technology* Jun 2026 - Jul 2026

- Developed frontend and backend features for DOSTrack, a document tracking system for managing document workflows.
- Implemented the Incoming Documents module with searchable tables, filters, status tracking, pagination, work-order modals, and attachment workflows to support document intake and processing.
- Built the User Profile Dashboard, including edit information and change password flows.
- Collaborated in standups, debugging sessions, branch-based development, and code reviews to support feature delivery.

Systems Development Intern, *Rakso Computer Technology, Inc.* Jan 2026 - Mar 2026

- Served as one of the project leads for the end-to-end design and development of a company-wide CRM platform, coordinating requirements across multiple functional teams.
- Managed a 4-person frontend team while contributing directly to frontend development, delegating tasks, enforcing deadlines, and aligning deliverables with business priorities.
- Produced high-fidelity Figma prototypes that consolidated requirements and accelerated stakeholder design reviews.
- Introduced Scrum workflows in YouTrack, improving sprint visibility, task ownership, and deadline tracking.

PROJECTS

Luntiang Republika IoT Soil Monitoring System (Capstone) | Full-Stack Developer

- Engineered an IoT-enabled soil monitoring and advisory platform for Thai basil cultivation with role-based access for farm operators, managers, and administrators.
- Developed a React frontend integrated with Firebase Authentication and Cloud Firestore, including protected routes and dashboards for sensor monitoring, alerts, recommendations, and historical trends.
- Built an Express.js API using the Firebase Admin SDK to manage alert workflows, recommendation lifecycles, user administration, audit logs, and calibrated sensor data.
- Coordinated Agile and Kanban delivery through YouTrack, tracking work items and project progress across a four-person capstone team.

SHEIN Mobile App Redesign and UX Research | UX Lead

- Led end-to-end UX research and redesign across three core user flows, producing low- and high-fidelity Figma prototypes that addressed five identified usability issues.
- Conducted task analysis and five user interviews, synthesizing findings through thematic analysis into four personas and corresponding user journey maps.
- Evaluated and refined the design using Nielsen’s usability heuristics and interaction design patterns across two iterative design cycles, supported by moderated think-aloud usability testing.

Cafe Database Application | Full-Stack Developer, Database Administrator

- Developed a multi-branch cafe ordering and management system with role-based access for customers, staff, managers, and administrators.
- Designed a 17-table MySQL database with foreign keys, indexes, views, triggers, and stored procedures to enforce data integrity and support operational reporting.
- Built Java Servlet-based RESTful endpoints for ordering and administrative workflows, implementing CRUD operations and transactional commit/rollback handling in Java and MySQL.

Taferia Web Application | Full-Stack Developer, Database Administrator

- Developed a full-stack establishment review platform with authentication, review management, search functionality, and interactive Leaflet maps using GeoJSON data.
- Designed MongoDB schemas for user-generated content and implemented 21 Express.js routes, including three JSON API endpoints, to support application workflows and data retrieval.

LEADERSHIP & ACTIVITIES

Associate Vice President | Publicity and CreativesSep 2024 - Aug 2025

La Salle Computer Society, De La Salle University

- Led a 10-member Publicity & Creatives committee for the organization’s flagship event; campaigns drove 2,100% increase in views, 1,100% increase in reach, 2,100% increase in visits, and 4,900% follower growth (Meta Analytics).
- Produced high-volume publicity materials and managed multi-project social media channels.
- Recognized as Top-Performing Officer for consistent delivery and collaboration on event branding and promotions.

Director | Integrated Marketing Communications - PublicityDec 2024 - Sep 2025

Computer Studies Government, De La Salle University

- Led a 9-member Publicity committee handling requests from multiple project heads and committees.
- Managed social media campaigns that generated more than 1,000 engagements and reached over 5,000 users.
- Collaborated with the Student Services Committee in disseminating information and addressing student concerns.

SKILLS

Backend: Node.js, Express.js, PHP, Java, Python, C, REST APIs
Frontend: JavaScript, TypeScript, React, HTML5, CSS3, Tailwind CSS, Vite, shadcn/ui, Bootstrap
Databases: SQL, PostgreSQL, MongoDB, Firebase, Supabase
Cloud & DevOps: AWS, Git, Github, Linux, Apache
UI/UX: Figma, Wireframing, Prototyping, Usability Testing, Design Thinking
Tools: VS Code, Cursor, IntelliJ IDEA, NetBeans, Notion, Google Workspace, Microsoft Office, Canva, phpMyAdmin, Power BI, Vercel, YouTrack
