PROFESSIONAL SUMMARY

Information Technology undergraduate at De La Salle University and a DOST Merit Scholar with internship experience in software development, UI/UX design, databases, and Agile project management. Proficient in React, JavaScript, TypeScript, Node.js, Express.js, Firebase, MySQL, MongoDB, Supabase, REST APIs, Git/Github, AWS, and Figma. Experienced in translating business and user requirements into secure, user-centered applications from requirements gathering and prototyping through development, testing, and implementation. Seeking opportunities where I can apply my technical and problem-solving skills, and collaborative approach to meaningful product development.

EDUCATION

Bachelor of Science in Information Technology, *De La Salle University* Sep 2022 - Present

- CGPA: 3.360/4.000, Honorable Mention Standing; Dean’s Lister, 2023-2026
- Department of Science and Technology–Science Education Institute (DOST-SEI) Merit Scholar

EXPERIENCE

Software Development Intern, *Department of Science and Technology* Jun 2026 - Jul 2026

- Developed frontend and backend features for DOSTrack, a document-tracking system used to manage document intake and processing workflows.
- Implemented the Incoming Documents module with searchable tables, filters, status tracking, pagination, work-order modals, and attachment-management workflows, and built a user profile dashboard with profile-editing and password-management functionality.
- Collaborated through standups, debugging sessions, code reviews, and Git-based branch workflows to support feature delivery.

Systems Development Intern, *Rakso Computer Technology, Inc.* Jan 2026 - Mar 2026

- Served as one of the project leads for the end-to-end design and development of a company-wide customer relationship management (CRM) platform, translating cross-functional requirements into technical and design deliverables.
- Managed a 4-person UI/UX and frontend team while contributing directly to frontend development, task delegation, deadline management, and stakeholder alignment.
- Produced high-fidelity Figma prototypes that consolidated business requirements and accelerated stakeholder design reviews.
- Introduced Agile/Scrum workflows in YouTrack, improving task ownership, sprint visibility, progress monitoring, and deadline tracking.

PROJECTS

Luntiang Republika IoT Soil Monitoring and Advisory System (Capstone) | Full-Stack Developer, UI/UX Designer

- Engineered an IoT-enabled platform that converted NPK, pH, and soil-moisture readings into actionable alerts, recommendations, and historical insights for plant cultivation.
- Developed a React and Vite frontend integrated with Firebase Authentication and Cloud Firestore, including protected routes and role-based dashboards for farm operators, managers, and administrators.
- Built an Express.js API using the Firebase Admin SDK to manage alert workflows, recommendation lifecycles, user administration, audit logs, and calibrated sensor data.
- Designed the system’s UI/UX, information architecture, and end-to-end workflows while implementing authentication, authorization, role-based access control, and audit logging.
- Coordinated Agile/Kanban delivery through YouTrack across a four-person development team.

SHEIN Mobile App Redesign and UX Research | UX Lead

- Led end-to-end UX research and redesign across three core user flows, producing low- and high-fidelity Figma prototypes that addressed five identified usability issues.
- Synthesized findings through thematic and task analysis into four personas, user journey maps, user stories, and design opportunities.
- Conducted moderated think-aloud usability testing across 11 tasks and completed two iterative design cycles, resolving four of the five identified usability issues.

Tafteria: Food Discovery and Review Platform | Full-Stack Developer, Database Administrator

- Developed a full-stack food discovery and review platform using Node.js, Express.js, MongoDB, Mongoose, Handlebars, and JavaScript, implementing session-based authentication, protected routes, reviews, comments, likes, image uploads, search, filtering, and community photo moderation.
- Designed MongoDB data models and built 26 Express.js routes, including four RESTful JSON API endpoints supporting discovery, geospatial data, and application workflows.
- Integrated OpenStreetMap data, Mapillary imagery, Leaflet, and GeoJSON to provide interactive, location-aware establishment discovery.

Cafe Database Application | Full-Stack Developer, Database Administrator

- Developed a multi-branch cafe ordering and management system with role-based access for customers, staff, managers, and administrators.
- Designed a normalized 17-table MySQL database with foreign keys, indexes, views, 15 stored procedures, and 15 triggers to enforce data integrity and automate business operations.
- Built Java Servlet-based RESTful APIs with JSON handling, CRUD operations, password hashing, role-based access control, and transactional commit/rollback to support ordering, payments, loyalty programs, reporting, and administrative workflows.

CheckYourself: Sexual Health Consultation and At-Home Test Kit App | UX Lead

- Led end-to-end UX research and design for a mobile sexual health platform, synthesizing user interviews into POV statements and How Might We questions that guided three core user journeys.
- Translated geographic, financial, privacy, stigma, and awareness barriers into an intuitive information architecture and low- and high-fidelity Figma prototypes for test-kit ordering, consultation scheduling, secure messaging, result tracking, and health records.
- Conducted three rounds of usability testing using feedback capture grids and completed three iterative design cycles, improving navigation, input clarity, task completion, and security cues based on user feedback.

Forum Friends: Forum Web Application | Full-Stack Developer

- Engineered a three-tier role-based access control system for users, managers, and administrators using five authorization middleware components.
- Implemented bcrypt password hashing, password-management functionality, audit logging, and security-activity tracking.
- Built management dashboards supporting user administration, content moderation, reporting, and platform analytics.

Simple Cinema Database Application | Full-Stack Developer, Database Administrator

- Built a Java, JSP, JDBC, and MySQL cinema management system covering employees, movies, screenings, showtimes, concessions, and customer transactions.
- Designed a normalized relational database with six core tables and foreign-key constraints to support operational reporting and inventory management.
- Implemented ticket and concession purchase workflows that updated seat and inventory availability and generated automated daily and monthly sales reports using aggregated SQL queries.

ACTIVITIES

Associate Vice President | Publicity and Creatives Sep 2024 - Aug 2025

La Salle Computer Society, *De La Salle University*

- Led a 10-member Publicity and Creatives committee for the organization’s flagship event and directed campaigns that increased views by 2,100%, reach by 1,100%, profile visits by 2,100%, and followers by 4,900%, according to Meta Analytics.
- Produced high-volume publicity materials and managed social media channels across multiple projects, earning recognition as a Top-Performing Officer for consistent delivery, collaboration, and event-branding contributions.

Director | Integrated Marketing Communications - Publicity Dec 2024 - Sep 2025

Computer Studies Government, *De La Salle University*

- Led a 9-member Publicity committee handling requests from multiple project heads and committees.
- Managed social media campaigns that generated more than 1,000 engagements and reached over 5,000 users.
- Collaborated with the Student Services Committee to disseminate information and address student concerns.

SKILLS

Programming Languages: JavaScript, TypeScript, Java, Python, PHP, C, SQL
Frontend: HTML/CSS, React, Vite, Tailwind CSS, Bootstrap, shaden/ui, Handlebars
Backend: Node.js, Express.js, Java Servlets, JSP, JDBC, REST APIs
Databases: MySQL, PostgreSQL, MongoDB, Mongoose, Firebase, Cloud Firestore, Supabase
Cloud and Development: AWS, Git, GitHub, Linux, Apache, Vercel
UI/UX: Figma, Miro, Wireframing, Prototyping, User Research, Usability Testing, Design Thinking
Tools: VSCode, Cursor, IntelliJ IDEA, NetBeans, Notion, Google Workspace, Microsoft Office, Canva, phpMyAdmin, Power BI, YouTrack
