PROFESSIONAL SUMMARY

Information Technology undergraduate with hands-on experience in software development, UI/UX design, project management, and database administration. Proficient in the MERN stack, SQL/PostgreSQL/NoSQL databases, Java, Figma, and AWS. Proven ability to translate user research into design decisions, lead development teams, deliver end-to-end systems, and apply Agile methodologies. Seeking an internship to contribute technical depth and a user-centered mindset to meaningful products.

EDUCATION

Bachelor of Science in Information Technology, *De La Salle University* Sept 2022 - Feb 2027 (Expected)

- CGPA: 3.334/4.000, Honorable Mention Standing

EXPERIENCE

Software Development Intern Jan 2026 - Mar 2026
Rakso Computer Technology, Inc.

- Co-led end-to-end development of a company-wide CRM platform across design and development phases, coordinating requirements across multiple functional teams.
- Managed a 4-person frontend team while contributing directly to frontend development, delegating tasks, enforcing deadlines, and aligning deliverables with business priorities.
- Produced high-fidelity Figma wireframes and interactive prototypes translating business requirements into validated designs, decreasing stakeholder review cycles.
- Introduced Scrum methodology via YouTrack as Scrum Master, reducing sprint bottlenecks and improving on-time delivery.

PROJECTS

Luntiang Republika IoT Soil Monitoring System (Capstone, Ongoing) | Full-Stack Developer, Software Lead

- Tools & Languages: JavaScript, React, Node.js, Express, Firebase (Auth & Firestore), Vite, Tailwind CSS, Figma
- Built an IoT-enabled soil monitoring and advisory platform for Thai basil cultivation with role-based access for operator, manager, and admin users.
- Developed a React + Firebase frontend with email/password authentication, protected routes, and role-specific dashboards for monitoring, alerts, recommendations, and historical trends.
- Implemented an Express.js API with Firebase Admin SDK + Firestore for alert workflows, recommendation lifecycle, admin user management, audit logging, and calibrated sensor data pipelines.
- Coordinated iterative team delivery using Agile/Kanban practices on YouTrack as a Service Delivery Manager, tracking work items and release progress across a 4-person capstone team.

SHEIN Mobile App Redesign & Research | UX Lead

- Tools & Methods: Figma, Wireframing, High-Fidelity Prototyping, User Interviews, Thematic Analysis, Usability Testing, Nielsen's Heuristics, Journey Mapping
- Led end-to-end UX research and redesign of the SHEIN mobile app in Figma, delivering low- and high-fidelity prototypes that addressed 5 identified usability gaps across 3 core user flows: browsing & searching, adding to cart, and checkout.
- Conducted task analysis and 5 user interviews, synthesizing findings through thematic analysis to develop 4 user personas and journey maps that grounded all design decisions in real user behavior.
- Applied Nielsen's 10 Usability Heuristics and established Interaction Design Patterns to evaluate and guide prototype iterations across 2 design cycles, ensuring alignment with usability standards.
- Facilitated a moderated think-aloud usability test, capturing qualitative feedback and verbal/non-verbal reactions that validated redesigned features.

CheckYourself: Consultation & Test Kit Ordering App | UX Lead

- Tools & Methods: Figma, Wireframing, High-Fidelity Prototyping, Design Thinking, User Interviews, Usability Testing, Information Architecture, Feedback Capture Grids
- Drove the full design thinking process from discovery to prototype across 3 core user journeys, anchoring decisions in POV statements and HMW questions synthesized from user interviews.
- Conducted user interviews surfacing 3 primary barriers that directly shaped the app's feature set and information architecture.
- Produced low- and high-fidelity Figma prototypes across 3 iterative cycles, translating research insights into a task-oriented interface with dedicated flows for ordering, scheduling, messaging, and profile management.
- Validated designs through 3 rounds of usability testing using feedback capture grids, identifying and resolving friction points across each iteration.

Cafe Database Application | Full-Stack Developer, Database Administrator

- Tools & Languages: MySQL, HTML/CSS, JavaScript, Java (Jakarta Servlets), Apache NetBeans
- Developed a multi-branch cafe ordering and management system with role-based access control (RBAC) for customers, staff, managers, and admins.
- Designed a 17-table relational database schema with foreign keys, indexes, views, triggers, and stored procedures, enforcing data integrity and supporting analytics/reporting queries.
- Built Servlet-based JSON API endpoints for end-to-end ordering/admin workflows, including CRUD operations (with transactional commit/rollback in both MySQL procedures and Java).

Simple Cinema Database Application | Full-Stack Developer, Database Administrator

- Tools & Languages: Java (JSP, JDBC), MySQL, HTML/CSS, JavaScript, Apache Netbeans
- Built a multi-module cinema management system using JSP and MySQL, covering movies, showtimes, concessions, and employee management.
- Designed and implemented a relational database schema with 6 core tables with foreign keys to support reporting and inventory updates.
- Implemented ticket and snack purchase flows, updating seat and stock availability and generating automated sales reports with aggregated SQL queries for daily and monthly reconciliation.

Tafteria Web Application | Full-Stack Developer, Database Administrator

- Tools & Languages: Node.js, Express.js, MongoDB, Tailwind CSS, JavaScript, Figma, Leaflet.js
- Built a full-stack establishments review platform, featuring authentication, review creation/editing/deletion, and establishment discovery with interactive Leaflet maps and GeoJSON.
- Designed MongoDB schemas for user-generated content and implemented 21 Express routes, including 3 JSON API endpoints, to support data retrieval and interactions.

Forum Friends - Forum Web Application | Web Developer

- Tools & Languages: Node.js, Express.js, MongoDB, HTML/CSS, JavaScript
- Engineered multi-level RBAC (User, Manager, Administrator) using 5 authorization middlewares to secure admin and moderation routes, enforcing clear separation of privileges.
- Implemented backend security features including bcrypt password hashing, audit logging, and security activity tracking, supporting full accountability across 3 user tiers.
- Built administration and moderation dashboards for user management, content moderation, and platform analytics.

EXTRACURRICULARS

Associate Vice President | Publicity and Creatives Sept 2024 - Aug 2025

La Salle Computer Society, De La Salle University

- Led a 10-member Publicity & Creatives committee for the organization’s flagship event; campaigns drove 2,100% increase in views, 1,100% increase in reach, 2,100% increase in visits, and 4,900% follower growth (Meta Analytics).
- Produced high-volume publicity materials and managed multi-project social media channels.
- Recognized as Top-Performing Officer for consistent delivery and collaboration on event branding and promotions.

Director | Integrated Marketing Communications - Publicity Dec 2024 - Sept 2025

Computer Studies Government, De La Salle University

- Led a 9-member Publicity committee handling requests from multiple project heads and committees.
- Managed social media platforms with 1,000+ student engagement and 5,000+ total reach.
- Collaborated with the Student Services Committee in disseminating information and addressing student concerns.

SKILLS

Backend: Node.js, Express.js, PHP, Java, Python, C, REST APIs
Frontend: JavaScript, TypeScript, React, HTML5, CSS3, Tailwind CSS, Vite, Shaden UI, Bootstrap
Databases: SQL (MySQL/PostgreSQL/NoSQL), MongoDB, Firebase, Supabase
Cloud & DevOps: AWS, Git/Github, Linux, Apache
UI/UX: Figma, Wireframing, Prototyping, Usability Testing, Design Thinking
Tools: VS Code, Cursor, IntelliJ IDEA, NetBeans, Notion, Google Workspace, MS Office, Canva, phpMyAdmin, Power BI, Vercel, YouTrack
